

What's New

For all Uni-Dur Products we grant a shelf life of min. 12 months.
Other producers – such as Bayer with Desmodur or Huntman with Irodur – only grant 6 months except Desmodur RC or which Bayer grants 12 months.

The “small” difference:

A box of Uni-Dur Products is only filled by 12 tins with a net weight of 9.6 kg to carry for the workers. A box of Irodur or Desmodur contains 20 tins which means the workers have to drag 15 or 16 kg. Mainly the women working in the shoe production prefer lighter weighted boxes.

<u>Products</u>	<u>shelf life</u>	<u>tins/box – weight</u>
<u>Uni-Dur</u>	<u>12 months</u>	<u>12 tins – 9.6 kg</u>
<u>Desmodur</u>	<u>6 months</u>	<u>20 tins – 15/16 kg</u>
<u>Irodur</u>	<u>6 months</u>	<u>20 tins – 16 kg</u>
